PROFESSIONAL PROFILE

Performance-focused and analytical Data Analyst with 3+ years of experience transforming complex business and financial data into actionable insights that improve efficiency, profitability, and strategic decision-making. Skilled in Microsoft SQL Server, Power BI, and Microsoft 365 tools (Excel, SharePoint, Access, Teams), with proven ability to design scalable data models and develop BI deliverables. Experienced in financial and operational analysis, and process improvement initiatives that drive business performance. Recognized for bridging technical and business perspectives to deliver reliable, data-driven solutions that empower organizational success.

INFORMATION TECHNOLOGY COMPETENCIES

Systems:	Windows PC
Database and BI Suite:	Relational Database, Microsoft SQL Server, Power BI (Desktop and Service), SSRS
Language:	T-SQL
Microsoft Tools:	MS Word / Excel / PowerPoint / SharePoint / Teams / Access / Power Query / Power Pivot

PROFESSIONAL EXPERIENCE

Data Analyst Jan 2025 – Present

GP DIGITAL INNOVATIONS | Newport News, VA

- Perform analyses on complex business data using Power BI and SQL Server to uncover trends and patterns that enhance operational efficiency and profitability.
- Author comprehensive technical documentation, including BI design specifications and user instructions to facilitate knowledge transfer and maintenance.
- Develop and maintain data models in Power BI and Excel Power Pivot, enhancing the accuracy and efficiency of reports.
- Ensure adherence to configuration management, version control, and release management standards during BI system updates and deployments.
- Write and optimize SQL queries and stored procedures to retrieve, verify, and consolidate data from databases.
- Automate repetitive reporting tasks using Excel, Power Query, SSRS, and scheduled refreshes in Power BI Report Server to streamline processes.
- Perform root cause analysis on data mismatches, ensuring reliability, data integrity, and transparency in analytical results.
- Communicate findings clearly through dashboards and reports that highlight performance drivers
- Work with cross-functional teams and stakeholders to brainstorm and gather business requirements and maintain accurate data flows between systems.

Junior Data Analyst

Dec 2022 – Dec 2024

GUINNESS CAMERON S.A. | Limbe, Cameroon

- Collected, cleansed, and structured large datasets from multiple sources using Power BI (Power Query) and SQL Server, ensuring high-quality, consistent data for reporting and analysis.
- Designed Power BI dashboards and Excel reports that visualized financial and sales performance KPIs for operational efficiency.
- Developed SQL scripts to extract data from multiple tables within relational databases, ensuring data integrity, reliability, and scalability.
- Participated in process documentation, building reusable workflows that improved data collection and analysis turnaround.
- Worked with stakeholders to ensure that insights aligned with business priorities and decision-making needs.

EDUCATION

Associate Degree in Data Analytics

, Oct 2020 – Nov 2022

Buea Institute of Technology | Cameroon

Bachelor of Science in Economics

, Oct 2018 – Jul 2022

University of Buea | Cameroon

CERTIFICATION

- Microsoft Certified: Azure Data Fundamentals
- Microsoft Power BI Data Analyst in progress.

PERSONAL PROJECT

- Project Title: Stellar Mart Corporation Sales Performance KPI
- Project Type: Supermarket Sales Dataset
- GitHub Repo: https://github.com/Awonfor/Stellar_Mart_Project

ADDITIONAL SKILLS

- Data storytelling and stakeholder communication
- Advanced Business Intelligence Reporting
- Trend Analysis
- KPI Tracking & Performance Measurement
- SQL Server Administration (Backup, Restore, Migration)
- Database Management & Optimization
- Visualization
- Attention to Detail
- Strong Problem-Solving & Analytical Thinking
